

Our Carbon Laser Skin Rejuvenation, otherwise known as the Hollywood Peel or Carbon Laser Peel, starts by application of a fine, medical grade carbon liquid on the skin. The laser is then applied and vaporizes the carbon, removing it from the skin and from the depths of the pores and with it, removing any bacteria or toxins that it has adhered to. It takes a 15 micron layer of skin off, leaving an amazing glow with a vibrant, more youthful complexion.

People in Hollywood do this just before the red carpet which is how it got its nick name The Hollywood Peel.

It's a great treatment for acne, especially active breakouts

Carbon Laser Skin Rejuvenation is a no downtime procedure. There is no pain with the procedure and it only takes about 60 minutes. The treatment can be repeated in 1 to 4 week intervals.

Frequently asked questions & answers

How can Carbon Laser Skin Rejuvenation help me?

Regular Carbon Laser Skin Rejuvenation treatments is suitable for men & women of all ages and assists people with acne, fine lines, dull or poor skin tone, large pores and helps to lessen the premature signs of aging.

How does the Carbon Laser Skin Rejuvenation feel?

Carbon Laser Skin Rejuvenation has been described as feeling warm or prickly, but not painful. It assists in leaving the skin looking clear and glowing. A minor 'sonic' boom is heard as the carbon particles are targeted by the laser and the light energy is absorbed by the carbon particles.

Is there any downtime after the Carbon Laser Skin Rejuvenation?

The procedure is non-invasive and you can return to normal activities straight after your treatment. You will need to ensure that you use the recommended SPF 50+ sunblock for any outdoor activities.

What can I expect on the day of my Carbon Laser Skin Rejuvenation?

On the day of your treatment you will need to remove any make-up or moisturizers. Make-up and sunscreen may be applied immediately following treatment.

How many treatments will I require?

To achieve ideal results regular treatments anywhere from a week to a month apart are recommended. After a series of 3-6 treatments a good maintenance program will ensure that you keep the results.

Are there any side effects?

The skin can appear slightly red after treatment but that usually disappears within a few hours.

Results can be improved by minimal sun exposure, not smoking and keeping stress to a minimum. The longevity of the effects from the treatment is determined by the skin condition, skin type and your lifestyle.
